1996 SL2

OEM Foglight Installation

Well i finally did it... it's so easy it's not even funny. No splicing was done.

~parts~

1-OEM fog light switch (second gens) \$20~eBay

pair-foglights \$10-\$100 best size for SL2's is 3.5"

1-87a relay ~free @ JY

6-UHJB panel pins (female)- JY

2-foglight brackets

~time~

takes about 1-2 hours to get it done right

~UHJB part~

-Disconnect the battery (the neg.)

-Disconnect the positive on the UHJB

-remove all fuses

-remove 2 12mm (i think) that hold the UHJB to the frame

-remove 2 12mm that hold the the fuse panel down

-carefully pull out the UHJB

-open the bottom (right side)

-unscrew the 3 (8mm) screws that hold the harness to the panel

-pull up on the panel to remove it

-take note on the diagrams on the UHJB cover, use those to locate where you'll be adding the pins (6 in total)

-remove the blue locking guide on the grey wiring harness

-row2, column 2 & 3, this is where you'll be adding 2 power wires to the fog lights.

-crimp the wires to the pins and install them, make sure they are in the right spot

-reinstall the blue locking pin

-put together the UHJB

-reconnect the wires

*note- remember to install a ground wire to each of the fog lights.

-install a 15 amp fuse and the relay to the fog light sections

to test and see if your new fog lights work make sure you have the OEM fog light switch installed, turn on the running light and click the fog light button.

I'll post some pics in the coming days and I will also be offering a kit with instructions and the pins that you need.

i'm sure this will work on all generations but i only have Gen 2.

Post questions.

REWARD EXCELLENCE!
